Quick Facts about Majoring in Molecular Biophysics & Biochemistry*
The molecular basis of life

The Molecular Biophysics and Biochemistry (MB&B) major is for students captivated by biology and for whom mechanistic understanding is primarily satisfied by engaging the subject at a molecular level. MB&B fosters creativity by integrating the scholarly and practical approaches of many disciplines. The result is a proud history of graduates who have leveraged their training for careers in medicine, research, entrepreneurship, pharma, teaching, consulting, journalism, law, policy and public service.

Curriculum
- Core required course sequences in Biochemistry and Biophysics
- A required laboratory course with flexibility that allows premedical students to take as fulfilling medical school chemistry lab credit or biology lab credit
- Majors can take two terms of Research for Credit for a letter grade (MB&B 470/471)
  - Can be expanded upon for your senior requirement
  - Can be leveraged to waive out of required laboratory courses
- Electives (two are required) that span deep dives in biological concepts, tools and methods for quantitative biology as well as coursework with cross-listings to Education Studies, English and History of Art.
- Option to pursue a 4-year dual BS/MS degree

Advising
The Director of Undergraduate Studies (Andrew Miranker) and Registrar (Liz Vellali) oversee an advising structure that includes 6 faculty members and four peer-mentors.

Faculty: Two MB&B faculty members serve as academic advisors for each graduating class. Majors pick their advisor when they join the department and see that advisor regularly until they graduate. The faculty advisors are the primary point of contact for majors and should be regularly consulted for current information, advice, reference letters, and signing of their course schedules.

Class of 2020: Professors Enrique De La Cruz (336A BASS) and Chuck Sindelar (CE25 SHM)
Class of 2021: Professors Andrew Miranker (318 Bass) and Christian Schlieker (235A BASS). Note, Professor Schlieker is substituting for Wendy Gilbert (C-127 SHM) while she is on sabbatical leave.
Class of 2022: Professors Michael Koelle (CE28 SHM) and Candice Paulsen (234 BASS)
Class of 2023: Professors Matt Simon (MIC 312A) and Lillian Kabeche (Location TBA). Note, these advisors are for freshman interested in knowing more about MB&B in advance of choosing a major.

You can also contact the DUS and Registrar directly at MBBUndergrad@yale.edu or 203-737-2060

Peer Mentors: A set of four junior and senior MB&B majors serve as peer mentors for students who are considering or entering the MB&B major. Peer mentors can give fellow students a sense of the experience of majoring in MB&B and practical advice on navigating the requirements and electives in our program. Feel free to contact any of these students for one-on-one advice, or attend one of their “peer-mentor dinners” which occur about once/month

Brennan Carman  brennan.carman@yale.edu  Class of 2020  Grace Hopper College
Anna-Sophia Boguraev  anna-sophia.boguraev@yale.edu  Class of 2020  Grace Hopper College
Raquel Sequeira  raquel.sequeira@yale.edu  Class of 2021  Timothy Dwight College
Cory Wu  cory.wu@yale.edu  Class of 2021  Grace Hopper College

Working in a Research Lab
Do work-study a lab, secure a paid summer internship, or take Research for Credit (MB&B 470/471). Ask your advisor for tips on finding a lab, pay attention to our weekly newsletter and see other advice in this handbook.

Noteworthy:
- Study halls during reading week attended faculty. Refreshments served!
- Monthly dinners hosted by Peer Mentors
- Weekly newsletter highlighting opportunities, events and pictures of the DUS’ and Registrar’s cats
- Undergraduate Research Symposia
