## Molecular Biophysics and Biochemistry

Director of undergraduate studies: Michael Koelle (he/him/his), SHM CE28A in the Medical School, MBBUndergrad@yale.edu

## Undergraduate registrar: Liz Vellali (she/her), 309 KT on Science Hill,

 MBBUndergrad@yale.eduFor class of 2026 and beyond. Earlier class years are encouraged to opt-in.
Alternatively, students may use the descriptions specific to their class year (http://catalog.yale.edu/ycps)

## MB\&B on one page

Members of the Department of Molecular Biophysics and Biochemistry (MB\&B) are united by a common view that processes in biology are understood when molecular, chemical, kinetic and thermodynamic contributions to mechanisms have been elucidated. Faculty and students are joined by a shared fascination with biochemistry, physical chemistry, structural biology, computation, spectroscopy, macromolecular engineering, imaging and the molecular basis of disease.

The core elements of our discipline are:
Biophysics $\quad 3$ credits for BA, 4 credits for BS and BS/MS
Biochemistry 3 credits
Science \& Society $1 / 2$ credit
Additional requirements in MB\&B serve to:

- support the core elements as prerequisites or accompanying labs
- teach advanced topics that make use of these underpinnings
- teach the technology that enables scholarship in our discipline
- give opportunity to seniors to demonstrate mastery of the discipline in writing

Practical Skills 1 credit for BA, 2 credits for $B S$ and 1 for BS/MS
Electives 1 credit for BA, 2 credits for $B S$ and 6 for BS/MS
Senior Thesis 1 credit for BA and BS, 4 for BS/MS
Three quarters of MB\&B graduates matriculate into PhD, MD and MD/PhD programs. Other recent graduates have joined companies specializing in finance, management consulting, biotechnology and pharma. Others have matriculated in law or business school and doctoral programs in the humanities. Still others have performed 1-2 years of public service, entered secondary education or joined the US armed forces as officers.

To directly engage students' interests and career goals, concentrations are available. These are named sets of electives, curated by the faculty, that count towards elective requirements and appear on your official Yale transcript. $\quad$ students may concentrate in Medicine, Computational Biology \& Bioinformatics, Biophysics and Structural Biology, Chemical Biology, Biochemistry, or Environment and Climate Change.

## Introductory Courses for First Years

We recommend you prioritize completing courses in the box below by the end of your first year. These courses are prerequisites for MB\&B 275 Biology at the Molecular Level, a course open to everyone and that $\sim 3 / 4$ of MB\&B students take as sophomores as their gateway into the major. Don't worry if you do not complete or place out of all 5 of these credits by the end of the first year! The MB\&B major is still open to you.

| CHEM 161 | General Chemistry I |
| :--- | :--- |
| CHEM 134L | General Chemistry I lab (1/2 credit) |
| CHEM 165 | General Chemistry II |
| CHEM 136L | General Chemistry II lab (1/2 credit) |
| MATH 112 | Calculus I |
| BIOL 101 | Biochemistry and Biophysics (taught by MB\&B Profs!)* |
| BIOL 102 | Cell Biology and Membrane Physiology* |
| *Can be taken concurrently in with MB\&B 275 with instructor permission. |  |

We further recommend students complete the 2.5 credits below as soon as they are able. These are prerequisites for courses that MB\&B students typically take in their junior year.

| CHEM 220 | Organic Chemistry I | $(\sim 2 / 3$ of MB\&B students take as sophomores) |
| :--- | :--- | :--- |
| CHEM 222L | Organic Chem I Lab | $(\sim 2 / 3$ of MB\&B students take as sophomores) |
| MATH 115 or 116 | Calculus II | $(\sim 1 / 4$ of MB\&B students defer this sophomore year) |

The $1 / 2$ credit courses below prepare students for conducting research in faculty labs across Yale and beyond, are co-taught with the Physics Department and are one of several ways to satisfy physics lab requirements for premedical studies. These modules are available to both first-year and $2^{\text {nd }}$ year students and are offered every semester to help students plan and balance their coursework demands across the liberal arts.

## MB\&B 121L Introduction to Physics in Living Systems Lab I: Observation and Analysis MB\&B 124L Introduction to Physics in Living Systems Lab IV: Electricity, Magnetism \& Radiation

n.b. MB\&B 122L and 123L will be introduced beginning fall of 2024

First Year Advising: Students are welcome to declare MB\&B as their major at anytime. Completing introductory course work is not required. We encourage declaration as it improves our ability to advise and send you pertinent information and dates. Once declared, MB\&B students are assigned one academic faculty advisor through whom they may also petition to have courses waived. Declaration of major is non-binding at Yale and changing major does not require anyone's approval. If you are not a declared major, no problem! Just send questions to MBBUndergrad@yale.edu and watch your email for informational events.

## Core elements of the Majors

## Biophysics:

All Majors: $\quad$| A two (BS and $B S / M S$ ) semester sequence or one (BA) semester of biophysical |
| :--- |
| chemistry. MB\&B 275 "Biology at the Molecular Level", is strongly recommended |
| and ideally taken in the fall of year 2. |
| There is no accompanying lab requirement, |

Alternatives to MB\&B 275 are CHEM 332, CHEM 328, CENG 300, APHY 420, MENG 211. MB\&B 275 cannot be taken after these courses.

BS majors: An additional 300+ elective in the physical natural sciences, physical engineering sciences, math, statistics, or computer science.
Accompanying labs are not required.
BS/MS majors: An additional 300+ elective emphasizing thermodynamics, statistical mechanics, quantum mechanics and/or spectroscopy, for example, CHEM 332, CHEM 328, CENG 300, APHY 420, MB\&B 431.
Accompanying labs are not required.
All majors: $\quad$ A two semester sequence PHYS 170/171 or higher (BA and BS), or PHYS 180/181 or higher ( $\mathrm{BS} / \mathrm{MS}$ ).
Accompanying labs for these classes are not required, but can be used to fulfill Practical Skills requirements described below.

## Biochemistry:

MB\&B 300/301 is a two semester, comprehensive sequence that defines MB\&B's perspective on biochemistry. It is required of all majors.
Course substitutions for MB\&B 300/301 are not permitted.
The prerequisites for MB\&B 300/301 is one semester of organic chemistry with lab, BIOL 101 and BIOL 102. While we recommend this course sequence be taken in year 3 , about $1 / 3$ of majors take this course sequence in year 2. MB\&B 300 may be taken concurrently with organic chemistry. There is no accompanying lab to MB\&B 300 or 301.

An additional 200+ level course in Chemistry, or CHEM 175, is required of all majors to further support understanding of Biochemistry. Majors typically take a second semester of organic chemistry, or inorganic chemistry, or options specified by particular concentrations. Accompanying labs are not required.

## Science \& Society:

The intersection of Molecular Biophysics \& Biochemistry with human identity and society is critically important to your training. Matters of personal and group identity underpin the history of our discipline's development, the lived experience of its practitioners, the achievement of excellence by diverse cultures co-working in our labs and the interaction of faculty and graduates with the public in secondary schools, businesses, hospitals and government.

All majors take at least $1 / 2$ credit of $100+$ coursework in this area. One mechanism is to take the initiative and independently explore this interface by taking MB\&B 268, "Society, Identity and STEM". This half-credit course meets in the second half of term and is taken simultaneously with any humanities course with significant focus on race, ethnicity, gender, sexuality, disability, veteran status, religion or any other aspect of human identity. MB\&B 268 may be taken up to two times for a letter grade.

An alternative approach to fulfilling this requirement is to take one of many courses at Yale that directly address this topic. This includes AFAM 170, MB\&B 107/268, HSHM 206/241/332/406/409/424/425/436/475/481, HIST 479, HLTH 140, SOCY 126/127/351, MCDB 375 or WGSS 270/457/741. Petitions for course substitutions (see below) are encouraged.

## Additional Requirements

## Practical Skills:

Many practical skills are vital to effective bench and computer-based research in biology and physics. Other practical skills benefit our ability to generate and test hypotheses and establish rigor when performing statistical analyses of data sets large and small. The juxtaposition of concepts and practical implementation in coursework results in lasting understanding.

BA majors take one credit and BS majors take two credits: across at least two of three categories: Physics Lab, Biochemistry Lab and Critical Tools. One or more courses (at least $1 / 2$ credit) must be from MB\&B. Courses that can be used to satisfy more than one category may not be double counted.

- Physics Lab: MB\&B 121L, 124L 364, 470/471*, PHYS 165L, 166L, CHEM 355L and others with DUS approval (see below).
- Biochemistry Lab: MB\&B 251L, 364, 470/471*, CHEM 355L, others including MCDB/EEB/BENG 200+ lab courses with DUS approval.
- Critical Tools: MB\&B 435, 470/471*, S\&DS 100+, 238, CPSC 100+ and others with DUS approval (see below).
BS/MS majors: Practical Skills are incorporated into the senior requirement
*This is research for credit coursework. Up to two credits may be taken for a letter grade. Categorization of the coursework into one of the three skills is dependent on your project and/or the lab in which your project is conducted.

## Electives

Seminar or lecture-based coursework as follows:
BA majors: one 200+ level in MB\&B
BS majors: one 200+ level in STEM and one 200+ level in MB\&B
BS/MS majors: six credits at the graduate level, $500+$ in science, math, statistics or engineering. Two of the six from MB\&B. Many graduate courses are $1 / 2$ semester modules. It is common for more than six courses to be used to reach six credits.

Courses holding both 300+ undergraduate and 500+ graduate course number can be retroactively converted to graduate course numbers to fulfill this requirement after admission to the BS/MS program. Courses that hold a 100- or 200-level undergraduate listing in any subject cannot be used towards the six credit limit.

## Senior Requirements

BA and BS majors: MB\&B 490 is a one credit course that culminates in the writing of a thesis in the spring term of senior year.

BS/MS majors: $\quad$ Completion of 5 credits of research for credit: MB\&B 470 or 471 is required by the end of fall semester of junior year. MB\&B 570 and 571 is taken during senior year. All 5 credits of research are expected to take place within the same lab and culminate in a 50-page thesis and a public oral defense during the reading period of your final semester.

## Concentrations

Concentrations in MB\&B are sets of electives, curated by faculty, designed to focus attention onto specific subfields of Molecular Biophysics and Biochemistry. Concentrations appear on a student's official Yale transcript and are currently available in Biophysics and Structural Biology, Chemical Biology, Computational Biology and Bioinformatics, Medicine, Biochemistry and Environment \& Climate Change.

Electives for concentrations can be used to fulfill the above elective options for the major which total 3.5 credits for BA majors, 6.5 credits for BS and 8.5 credits for $\mathrm{BS} / \mathrm{MS}$ majors:

- CHEM 200+ or CHEM 175 1 credit BA, BS and BS/MS
- 300+ in physical sci, engineering (not BENG), math, statistics, or computer sci. 1 credit BS
- $300+$ elective in thermodynamics, statistical mech, quantum and/or spectroscopy 1 credit BS/MS
- Science and Society
$1 / 2$ credit BA, BS, BS/MS
- Practical Skills

2 credit BS, 1 credit BA ( $1 / 2$ credit of which must be in MB\&B)

- STEM elective at $200+$

1 credit BS

- MB\&B elective at $200+$ 1 credit BA, BS
- MB\&B elective at $500^{+}$ 2 credits BS/MS
- STEM elective at $500+$ 4 credits BS/MS

For example, a BS major concentrating in Medicine must fulfill one course in statistics. S\&DS 220 can fulfill the concentration's requirement and also count as a 200+ level STEM elective for the major. Sample schedules for each concentration for BS students are provided below.

Students can take up to one credit of upper level requirements as Credit/D/Fail (details below). For example, a BS major concentrating in Medicine and fulfilling their 300+ physical science requirement using CHEM 332 may take this class Cr/D/Fail and still have it count toward the major.

Placement exams and acceleration credits do not count towards completion of concentration-specific requirements. E.g. A BS Major who places out of 100 -level statistics and is pursuing a concentration in Computational Biology and Bioinformatics is still expected to complete the concentration's requirement for 3 courses in MATH/S\&DS/COMP.

## Concentration in Medicine

The MB\&B concentration in Medicine is designed for students with strong interests in the molecular basis of physiology and disease. MB\&B offers a unique lens on these subjects as it was formed as a merger of the Yale Medical School Department of Biochemistry and the Yale College Department of Molecular Biophysics. MB\&B faculty maintain labs in both schools (as well as West Campus) and instructs both Yale undergraduates and Yale medical school students. Majors aspiring to graduate studies in biomedical sciences, work in biotechnology or enter medical school are particularly encouraged to fulfill this concentration:

## Requirements

Genetics and Development and Ecology and Evolution (1 credit): BIOL 103/104 or higher
Organic Chemistry (1 credit): Second term organic chemistry, CHEM 175 or CHEM 221
Accompanying lab is not required.
Statistics (1 credit): S\&DS 100+ or (MATH 200+ in these subjects: linear algebra, probability, statistics or stochastic processes)

Psychology (1 credit): PSYC 110 or higher

## Physics lab (2 courses totaling 1 credit or more): MB\&B 101L, PHYS 165L, PHYS 166L or <br> MB\&B 364 and others

Research (1 credit): Research for credit on a project focused on basic biological or biomedical research, MB\&B 470 or 471. Alternatively, course-based undergraduate biomedical research experience (CURE), MB\&B 251L, MCDB 291L and others. See course substitutions policy below.

## Advanced (300+) Biomedical Lecture or Seminar (1 credit):

MB\&B 449 Medical Impact of Basic Science
MB\&B 445 Methods and Logic in Molecular Biology
MB\&B 452 Biomedical Data Science, Mining and Modeling
BENG 350 Physiological Systems
MCDB 315 Pathobiology
MCDB 450 The Human Genome
Other choices for the above are encouraged and possible by petition.
See course substitutions policy below.

Note: The core BS major requires 12.5 credits while the core BA major requires 9.5 credits. For students with no advanced preparation in STEM, the concentration in Medicine (see sample schedules below) can be completed with 2 additional credits over the core BS major and 3 additional credits over the core BA requirements.

## Computational Biology \& Bioinformatics

The MB\&B concentration in Computational Biology \& Bioinformatics is designed for students with a combination of strong interests in computer science, data science, statistics and biology. Majors aspiring to graduate studies in computational biology, bioinformatics, medical informatics or biotechnology are particularly encouraged to fulfill this concentration:

## Requirements

Genetics and Evolutionary Biol (1 credit, BA): BIOL 103 and 104, or follow the BS guideline.
Genetics and Evolutionary Biol (1 credit, BS): A 200+ elective in genetics, molecular biology or evolutionary biology. This elective may be used in place of MB\&B's requirement for a 200+ elective in Chemistry: MCDB 200, MCDB 202, MCDB 310, MB\&B 330 and others.

Computer Sci, Math, Stats (2 credits, BA):
Computer Sci, Math, Stats ( 3 credits, BS):
CPSC 201 and S\&DS 100+
CPSC 201 and (S\&DS 238 or S\&DS 241) and (CPSC 223 or S\&DS 265). CPSC 223 may be used to fulfill the 300+ elective requirement in physical sci, physical engineering, math, statistics,or computer sci.

Advanced (300+) Computational Biology \& Bioinformatics (1 credit):
MB\&B 452 Biomedical Data Science, Mining and Modeling
CPSC 453 Unsupervised Learning for Big Data

Other choices for the above are encouraged and possible by petition.
See course substitutions policy below.

Note: The core BS major requires 12.5 credits while the core BA major requires 9.5 credits. For students with no advanced preparation in STEM, the Computational Biology \& Bioinformatics concentration (see sample schedules below) can be completed with 3 additional credits over the core BS major and 3 additional credits over the core BA requirements.

## Chemical Biology

Chemical Biology leverages the tools and concepts of chemistry to understand, leverage and/or manipulate biological processes. Students' interested in the MB\&B concentration in Chemical Biology select electives from organic and inorganic chemistry as well as advanced courses in cell biology. Majors interested in additional studies in chemical biology, drug-development and/or biotechnology after graduation are particularly encouraged to fulfill this concentration:

## Requirements

## Organic Chemistry II (1.5 credits):

Second semester of organic chemistry with accompanying $1 / 2$ credit lab.
Cell Biology and Chemistry ( 3 credits for BS):
$2 \times 200+$ and $1 \times 300+$ electives in Chemistry or Cell Biology.
At least one of the credits must come from Cell Biology or Chemistry.
Cell Biology ( 1 credit for $B A$ ):
$1 \times 200+$ electives in Cell-based biology
Research in Chemical Biology (1 credit): Research for credit on a Chemical Biology project (broadly interpreted), MB\&B 470 or 471. Alternatively, MB\&B 364 or course-based undergraduate chemical biology research experience (CURE) by petition to DUS. See course substitutions policy below.

Advanced (300+) Chemical Biology Lecture or Seminar (1 credit):
MB\&B 443 Advanced Eukaryotic Cell Biology
CHEM 419/424 Foundations of Chemical Biology I / II

Other choices for the above are encouraged and possible by petition.
See course substitutions policy below.

Note: The core BS major requires 12.5 credits while the core BA major requires 9.5 credits. The concentration in Chemical Biology (see sample schedules below) can be completed with one additional credit requirement over the core BS major and two additional credits over the core BA requirements.

## Biochemistry

The MB\&B concentration in Biochemistry is geared towards students seeking robust training in structure and function of nucleic acids and proteins in the context of life processes. Molecular length scale biochemistry is foundational to the mechanisms by which dynamic networks of molecular machines enable everything from cellular function to whole organism physiology. Failures in these networks are responsible for pathology in plants and animals, agriculture and medicine. MB\&B majors interested in working in these fields directly after graduation, or who hope to pursue graduate studies including PhD and MD/PhD are particularly encouraged to fulfill this concentration:

## Requirements

Genetics and Development and Ecology and Evolution (1 credit): BIOL 103/104 or above.
Molecular, Cellular or Organismal Biology 200+ (1 credit): MCDB 205, MCDB 202 and others
Research in Biochemistry (1 credit): Research for credit on a project with biochemical emphasis (broadly interpreted), MB\&B 470 or 471. Alternatively, course-based undergraduate research experience (CURE) in biochemistry by petition to DUS.

Advanced (300+) Biochemistry Lecture or Seminar (2 credits for BS, 1 credit for BA):
MB\&B 365 Biochemistry and our Changing Climate
MB\&B 330 Modeling Biological Systems
MB\&B 445 Methods \& Logic in Molecular Biology
MB\&B 449 Medical Impact of Basic Research
MB\&B 443 Advanced Eukaryotic Cell Biology

Other choices for the above are encouraged and possible by petition.
See course substitutions policy below.

Note: The core BS major requires 12.5 credits while the core BA major requires 9.5 credits. For students with no advanced preparation in STEM, the concentration in Biochemistry (see sample schedules below) can be completed with two additional credit requirements over the core BS major and 3 additional credits over the core BA requirements.

## Environment and Climate Change

The MB\&B concentration in Environment and Climate Change is geared towards students seeking robust training in life processes as they affect, and are affected by the environment, human activity and climate change. MB\&B majors interested in working in these fields directly after graduation, or who hope to pursue graduate studies including PhD are particularly encouraged to fulfill this concentration:

## Requirements

Physical Environmental Science 300+ (1 credit for BS and BS/MS)
May be used to fulfill 300+ requirement in physical/engineering sciences.

| EVST 362 | Observing Earth from Space | EPS 335 | Physical Oceanography |
| :--- | :--- | :--- | :--- |
| EPS 310 | Isotope Geochemistry | CHEM 332 | Thermodynamics |
| EPS 323 | Climate Dynamics | CHEM 333 | Quantum Mechanics |

Environmental Chemistry 200+ (1 credit for BA, BS and BS/MS)
May be used to fulfill 200+ elective requirement in Chemistry

| EVST 307 | Organic Pollutants in the Env. | CHEM 252 | Inorganic Chemistry |
| :--- | :--- | :--- | :--- |
| EPS 310 | Isotope Geochemistry | ENVE 438 | Environmental Org Chemistry |

Math, Statistics and/or Computer Science (1 credit for BA, BS and BS/MS)
May be used to fulfill one credit of practical skills requirement for $B A$ and $B S$
Math 120/121/222 or higher, S\&DS 100+ or CPSC 100+
Ecology and Evolution 100+ (1 credit for BA, BS and BS/MS)
Courses at 200+ may be used to fulfill 200+ STEM requirement for BS

| BIOL 104 | Principles of Ecology and Evolutionary Biology |
| :--- | :--- |
| E\&EB 225 | Evolutionary Biology |
| ANTH 267 | Human Evolution |

Environmental Sciences 100+ (1 credit for BA, BS and BS/MS)
Courses at 200+ may be used to fulfill 200+ STEM requirement for BS

| CENG 120 | Intro to Environmental Engineering | EPS 101 Climate Change |  |
| :--- | :--- | :--- | :--- |
| EPS 140 | Atmosphere, Ocean \& Climate Change | EVST 223 General Ecology |  |
| EVST 265 | Environmental Geomicrobiology | EPS 125 History of Life |  |
| EPS 232 | Earth Surface Processes | EPS 261 | Minerals \& Human Health |

Advanced (300+) Environment Lecture or Seminar (2 credits for BS and BS/MS, 1 credit for BA)
MB\&B 365 may be used to fulfill 200+ MB\&B requirement for all degrees

| MB\&B 365 | Biochemistry \& our Changing Climate | ENVE 441 | Bio Processes in |
| :--- | :--- | :--- | :--- |
| ENVE 464 | Engineering Solutions to Climate | EPS 323 | Environmental Engineering |
|  | Change | Climate dynamics |  |
| EVST 415 | Biotechnology \& Developing World | ENVE 360 | Green Engineering and |
| EPS 355 | Extraordinary Glimpses of Past Life |  | SNstainability |
|  |  | ENVE 438 | Environ. Organic Chem. |

Other choices for the above are encouraged and possible by petition.
See course substitutions policy below.
Note: The core BS major requires 12.5 credits while the core BA major requires 9.5 credits. For students with no advanced preparation in STEM, the concentration in Environment and Climate Change (see sample schedules below) can be completed with one additional credit requirements over the core BS and core BA requirements.

## Biophysics and Structural Biology

The MB\&B concentration in Biophysics and Structural Biology is designed for students with strong interests in life processes on the molecular length scale. Majors aspiring to graduate studies in biophysics, molecular medicine and biotechnology are particularly encouraged to fulfill this concentration.

Biophysics and Structural Biology are made possible by fundamental quantitative and physical tools such as linear algebra, Fourier analysis, x-ray diffraction, imaging and optical spectroscopy to measure biomolecular dynamics and atomic resolution structure. Seminar courses applicable to this area focus on the basic biology enabled by exquisitely specific macromolecular interactions, the molecular basis of disease and drug-design.

## Requirements

Comp. Sci, Math, Statistics ( 1 credits, BS): MATH 120 or 121 or 225 or S\&DS 238 or CPSC 112
Comp. Sci, Math, Statistics (1 credits, BA): MATH 120 or 121 or 225 or S\&DS 100+ or CPSC 112
Biophysical Chemistry (1 credit, BS): CHEM 332 or MB\&B 431 or any 300+ elective in thermodynamics, statistical mech, quantum mechanics or spectroscopy.

Research in Biophysics and Structural Biology (1 credit): Research for credit on a solution biophysical or structural biology project (broadly interpreted), MB\&B 470 or 471 . Alternatively, CHEM 355, or course-based undergraduate biophysical or structural biology research experience (CURE) by petition. See course substitutions policy below.

Tools and Quantitative Analysis (1 credits, BS): 200+ course with emphasis on measurement and/or modeling of energy, kinetics, or structure relevant to the molecular length scale. MB\&B 330/420/431/435, CHEM 333/406/492 and others

## Advanced Biophysics and Structural Biology Lecture or Seminar (1 credit):

MB\&B 420 Macromolecular Structure and Biophysical Analysis
MB\&B 431 Illuminating Biomolecular Mechanism with Structure
MB\&B 529 Structural Biology and Drug Discovery

Other choices for the above are encouraged and possible by petition.
See course substitutions policy below.
Note: The core BS major requires 12.5 credits while the core BA major requires 9.5 credits. For students with no advanced preparation in STEM, the concentration in Biophysics and Structural Biology (see sample schedules below) can be completed with one additional credit requirements over the core BS major and 2 additional credits over the core BA requirements.

## Policies and Procedures

Course Substitutions: Students may petition for DUS approval (see below) for course substitutions by assembling the relevant syllabi and writing a short justification (<300 words). Thoughtful requests in line with MB\&Bs teaching goals are always welcome.

Credit/D/Fail: To encourage BA and BS majors to explore more challenging coursework, students are welcome to complete one credit requirement as Credit/D/Fail. This will not affect your ability to graduate with distinction, but does count against Yale's limit of 6 total Credit/D/Fail courses. Qualifying courses must be $400+$ in MB\&B, and 300+ in any other STEM subject. For BS/MS students, all required coursework must be taken for a letter grade.

MB\&B Academic Advisors: Students are assigned a member of MB\&B faculty for academic advising as soon as they declare their major. Requests for change in advisor should be sent to the registrar via direct email (elizabeth.vellali@yale.edu). Justification is not required nor is DUS approval.

DUS Approvals: DUS approvals for waivers, course substitutions, endorsement of petitions to the Committee on Honors and Academic Standing, applications to the BS/MS program etc, are initiated by an email of support from students' assigned MB\&B academic advisor (see above). The academic advisor functions as the student's advocate on requests to the DUS with the MB\&B registrar giving oversight and interfacing with the University registrar. Very important: one-on-one meetings by majors with their MB\&B academic advisor during every registration period are logged. Failures to schedule meetings and missed meetings are factored into the DUS approval process.

## Sample Schedules

Available below are sample student schedules for hypothetical students who arrive at Yale with no advanced preparation. For perspective:
About $1 / 3$ of MB\&B students place out of General Chemistry About $4 / 5$ of MB\&B students place out of Calculus I.

| Bachelor of Science (BS) in Molecular Biophysics \& Biochemistry |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Sample Schedule for Concentration in: |  |  |  | Credits |  |  |  |  |  |  | Additional Elements |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  | Core Elements |  |  | Additional Requirements |  |  | Practical Skills |  | Concentration Specific |  |  |  |  |  |  |  |
|  |  |  | Medicine |  |  |  |  |  |  | $\begin{aligned} & \text { E } \\ & \dot{\text { © }} \\ & \text { 区 } \\ & . \bar{O} \\ & \dot{D} \\ & \hline \end{aligned}$ |  |  |  |  | $\begin{aligned} & E \\ & \tilde{0} \\ & .0 \\ & 0 \\ & 0 \\ & 0 \\ & 0 \\ & \hline 0 \end{aligned}$ | $$ | $E$ $\frac{0}{0}$ $\frac{0}{0}$ $\frac{0}{0}$ $\frac{1}{2}$ |  |  |  |
| Term | Dept | \# | Name |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 든 | CHEM | 161 | General Chemistry I | 1 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | CHEM | 1344 | General Chemistry I Lab | 0.5 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | MATH | 112 | Calculus I | 1 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
